Transcription notes

- 1. Transcribed from the official Hisar collector-rate notification for 2023-2024, which prints the 2022 rate alongside, so both years can be compared here.
- 2. Contents: 354 urban localities, 86 agriculture-land entries, 91 village abadi entries and 10 construction-category rows.
- 3. A blank rate cell means the original printed '-' — it is not a zero.
- 4. Licensed colonies are listed against their licence number; for those rows the name column carries the khasra numbers, as in the original.
- 5. Pages 33-71 of the original carry khasra-wise conditions and special rates written in Hindi prose. Those are not reproduced here — please read them in the original document.
